

Henri Azibert Joins *Pumps & Systems MENA* Editorial Advisory Board

The technical director for the Fluid Sealing Association will provide valuable industry insight for the new magazine.

BIRMINGHAM, Alabama, USA (August 25, 2014) – *Pumps & Systems MENA*, the new magazine for pump users in the Middle East and North Africa, announced that Henri Azibert, the technical director of the Fluid Sealing Association (FSA), has joined its Editorial Advisory Board.

“I look forward to working with the staff at *Pumps & Systems MENA*,” Azibert said. “The global pumps market is very important to our members.”

As an Editorial Advisory Board member, Azibert will be consulted on the latest trends and challenges in the MENA pumps market.

This summer, he was appointed to FSA technical director. A longtime member, he previously served as chairman of the mechanical seal division and of the mechanical seal and mechanical packing technical committees. He also held the office of vice president for the last two and a half years.

Under Azibert’s editorial direction, the FSA continues to contribute the popular “Sealing Sense” column monthly to *Pumps & Systems*, the parent publication of *Pumps & Systems MENA*.

“Henri is an experienced and well-respected authority on mechanical seals and packing,” said *Pumps & Systems MENA* Editor Michelle Segrest. “Our readers in the Middle East and North Africa can count on Henri’s technical expertise and service in his industry.”

Azibert is looking forward to the industry’s growth in the MENA region.

“It’s a great time for our industry to discuss how products and techniques are evolving around the world, particularly in the MENA region,” he said.

Azibert joined the A.W. Chesterton Company in 1980 as a design engineer in the mechanical seals division. He was responsible for all the mechanical seal and mechanical packing engineering staff and product lines. He was granted more than 30 patents on mechanical seal designs and improvements.

PUMPS & SYSTEMS

The Leading Magazine for Pump Users Worldwide

MENA

About Pumps & Systems and Pumps & Systems MENA

Pumps & Systems MENA provides relevant information on pump technology to more than 15,000 consultants, engineers, EPC contractors, operators, executives and other pump professionals in the Middle East and North Africa region. It focuses on relevant news, case studies and pumping system technology from the Oil & Gas (upstream and downstream), Water & Wastewater, Power Generation, Food & Beverage Processing, Building Services and Chemical, Petrochemical & Refinery industries.
